

Abilisoft Lite

Are you a small to medium sized business, with a requirement to cost effectively monitor and manage up to 30 servers and applications?

Then Abilisoft Lite is the product for you.

Introducing Abilisoft Lite

Abilisoft Lite delivers an affordable server and application management solution that is quick to install, easy to use and simple to maintain. It manages the complexities of IT monitoring across multiple operating systems, applications, databases and networks, with rapid implementation and ease-of-use.

Abilisoft Lite provides real time information on your IT environment, how it is performing and if a service is degrading. **Abilisoft Lite is the perfect, simple to deploy solution** for sites with a small number of servers. It installs out of the box using intuitive setup screens and will connect to legacy systems if required.

Abilisoft Lite is bundled for 10, 20 or 30 agents. Each agent contains the following monitors of which any number can be selected:

• CPU	• Disk	• Directory	• DB(Oracle, Sybase [any on Windows using ADO])
• Memory	• File	• HTTP	
• Swap space	• SNMP	• Network interface	
• Ping	• System information	• Process	

The benefits

- **Abilisoft Lite reduces operational expenditure** - By centralising the management of IT monitoring, Abilisoft enables you to save time and money
- **Abilisoft improves business performance** - With enhanced levels of automation, coupled with the most proactive and advanced agent technology on the market, Abilisoft improves business processes and efficiency
- **Abilisoft enables your business to grow** - With Abilisoft's unparalleled scalability, and ability to quickly adapt to new technologies, organisations are able to grow their infrastructure whilst managing costs

The features

User Interface - Abilisoft Lite presents data in a **single, easy to use dashboard**, enabling you to connect to and interact with multiple agents via a web browser. Features include:

- Configures and reports on multiple agents quickly and easily
- Carries out queries on agents
- Provides a graphical representation of certain metrics, including agent performance
- Stores test results for future analysis

The Abilisoft Lite interface gives the administrator visibility of the raw results of every test being performed. This enables users to evaluate servers, applications and network devices at a very detailed level, to accurately perform fault diagnosis and resolution.

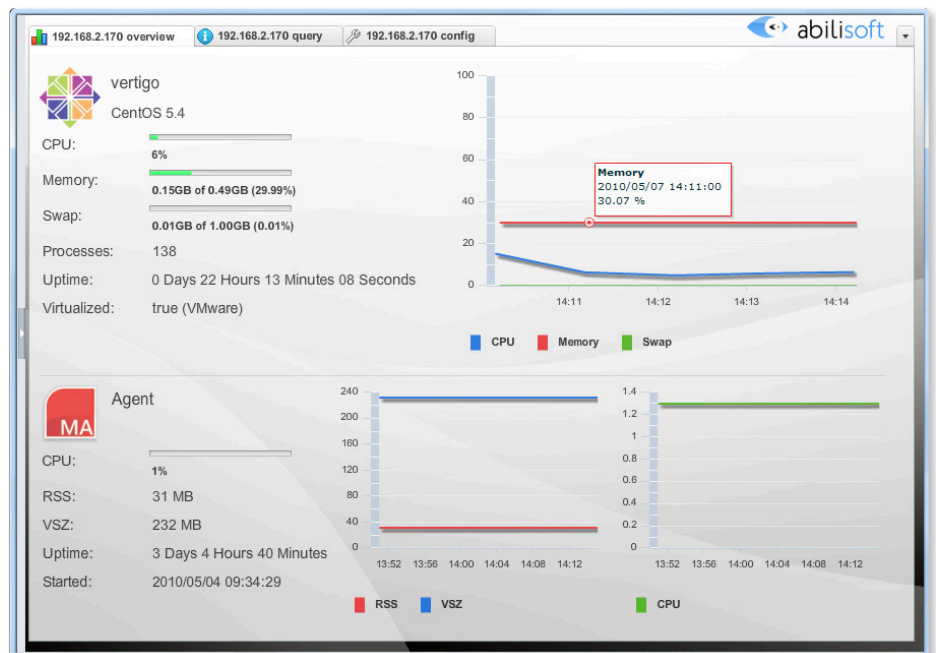

Superior agent technology

The Abilisoft agent technology is the **best on the market**, which, combined with the lightweight user interface, provides a **dynamic solution for your business**:

- Simultaneously monitors servers, applications, services and networks, in real time
- Provides live event notification in virtual, physical and cloud environments

The Abilisoft Lite agent is a low-footprint software component that can be installed on a wide range of platforms to monitor a server's health and the health of applications executing on that server, by performing specific tests on a periodic basis.

Abilisoft Lite allows the agent to perform an action when a user definable threshold is breached. Actions included are (Trap, Command and Email).
